## About This Game

Wetwork is a stealth action game.

The protagonist is an assassin and their objective is to eliminate their target as silently and cleanly as possible. They have many tools at their disposal - CQC, pistols, smgs, assault rifles, sniper rifles, explosives and the like. It's also possible to take enemy's clothing to impersonate them and infiltrate restricted areas.

The game is open ended and its missions can be completed in many different ways. Intelligence agencies don't usually arbitrarily restrict the available weapons so all of them are available to the player. There are no "best weapons" that can be unlocked.

### Currently available weapons:

- Poison and sedative syringes
- Combat knife
- 5 handguns
- 3 SMGs

- 
- 6 Rifles
  - 2 Shotguns
  - Minigun
  - 4 Sniper rifles
  - 8 types of explosives

The weapon list is quite big, but both missions can be completed without taking any weapons with you. (And this is the only way to get the best rating)

**Currently available missions:**

**Training Level - Kārlis Ulmanis Memorial Park.**

A small urban area with a park at its centre. Introduces the player to various weapons and gameplay mechanics. Can be beaten in about 2 minutes. This is also available in the free demo.

**Mission 1 - Ventspils.**

A bit bigger rural area near the Baltic Sea. The main objective is to infiltrate a corrupt politician's mansion and take him out. No hand holding this time.

The game is set in 2030s and takes place in Latvia.

it looks like a beautiful mobile game but without a f\*\*\*\*\* shop like actually so i love this point ! And i love that the goal is not  
to kill but to run with a really nice and cool music. The decor is amazing.

A good moment to relax and take a deep breath ^^!. 5000 Hunters. I was going to give this game a positive review and  
recommend it, until I realised that the 'free' part is just a short prologue, and the rest of the game charges you per chapter.

There's just not enough content available for me to recommend buying any of the added chapters, since part one is so short. I  
have no idea how big the rest of the chapters are, and I don't want to pay £4.00 per chapter if each chapter only takes an hour at  
the most.

Technically the gameplay is pleasant and easy to understand, and the artwork is visually appealing, but that price tag is just not  
worth it. If you can get the game as a sale, then go for it, otherwise steer clear.. Absolutely adore these games. i love little puzzle  
and strategy games like this. It relaxes me and i find it peaceful to just listen to music or even some youtube vids as background  
noise while playing this game.. An \*incredible\* loving homage to 80's arcade games, like Ghosts'n'Goblins, Castlevania, etc  
Complete with FM synth sound, 16-bit pixelish graphics and scanlines, but fortunately \*without\* the stroke-inducing difficulty.  
No, the difficult is, at most, merely \*tumor\* inducing.

Thankfully, I live in a country with socialized medicine, and can therefore afford to request a sequel.. I love this game! The  
overall graphic style with the impressive soundtrack is addictive. Id recommend getting this just for the soundtrack, the game is  
a bonus. You can buy the OST - but I have decided not to because apparently they haveny made it as separate tracks., which is a  
shame.

If you run 2K monitor - say at 2560 x 1080 then the game doesnt support that video mode.  
Still - recommended!

This helps a lot with the NG+ runs and ending hunting, but I would recommend against it for your first playthrough \*\_\*. 2D platformer where you have 10 seconds to beat each stage.

By using a melee attack, three throwing daggers (per stage) and double jumping you have to clear out all enemies on the map before the timer reaches 0.

If you enjoy playing the same stage over and over again just to shave off that 0.01 second needed in order to get that 3-star rating, then this game is for you. If you don't enjoy that sort of gameplay then you're probably better off playing something else.

Beating the stages within 10 seconds is usually not that hard once you figure out how, but getting the better ratings, now that's where the challenge (and fun) is at. Many of the stages feel more like a puzzle than a 2D platformer, since once you figure out the best route pulling it off is not really that hard. This means you have to use your brain as well as your fingers, which is great.

The game contains 100 stages, including the 40 stages from the first game (so no need to buy that one if you haven't already), and depending on your skill it shouldn't take you more than 10 hours to get the best rating on all stages and modes.

In my opinion 10 Second Ninja X is well worth the price, but it does go on sale fairly often so you might want to wait for that.. i want my money back it dont work. Seems like a great game if I could play it more than 5 minutes without it crashing. Faulting
